## **Directory of Primary Wood Processors**

John Tuttle  
Tom Treiman  
Jennifer Battson

### **Missouri Department of Conservation**

This directory is a listing of primary wood processors currently operating in the State of Missouri. Primary wood processors are defined as firms manufacturing a product from previously unprocessed raw materials such as logs, bolts, or unpeeled posts. Types of wood processors generally included in this category are: sawmills, shavings mills, wood handle plants, stave and heading mills, post peeling plants, concentration yards, buying yards, charcoal kilns, veneer plants, chip mills and log brokers. Information in this directory was collected by Foresters from the Missouri Department of Conservation. An effort was made to contact every known primary wood processing firm in Missouri, however listing in the directory is voluntary. Some firms declined to be listed, so users may not find a listing for a specific mill for which they are searching. Errors and corrections should be reported to the Missouri Department of Conservation at (573) 522-4115, ext. 3304.

### **Using this Directory**

All listings in this directory are arranged in alphabetical order by company name within the county of their location. Alphabetical indices are provided by both company name and type of processing. A state map with county names is also included which shows the distribution of primary wood processors within the state.

In addition to name, address and contact information, each listing indicates the relative size of the business in the units in which their products are measured, the relative number of employees, species used, and the variety of products normally produced.

### **Electronic Version**

An electronic version of this directory is also available on the Missouri Department of Conservation web site, within the Forestry Pages, at:  
<http://mdc4.mdc.mo.gov/applications/MOMills/MOMillsSearch.aspx>

# Missouri's Primary Wood Processors 2007

This map illustrates the geographic distribution of primary wood processors in Missouri for the year 2007. The state is divided into its 114 counties, each labeled with its name. Black dots represent the locations of individual wood processors. The distribution is as follows:

- Western Missouri:** Processors are located in Holt, Andrew, DeKalb, Buchanan, Clinton, Platte, Clay, Ray, Carroll, Chariton, Randolph, and Marion.
- Central Missouri:** Processors are found in Putnam, Schuyler, Scotland, Adair, Sullivan, Grundy, Linn, Macon, and Monroe.
- Eastern Missouri:** This region has the highest density of processors. They are concentrated in the St. Louis area (St. Louis City, St. Louis, St. Charles, Warren, Franklin, Gasconade, Callaway, Boone, Montgomery, Lincoln, Ralls, Pike, Audrain, and Monroe) and the Bootheel region (St. Genevieve, Perry, Cape Girardeau, Madison, Wayne, Reynolds, Shannon, Howard, Ozark, Barry, Stone, Christian, Douglas, Webster, Wright, Greene, Lawrence, Jasper, Barton, Dade, Polk, Dallas, Laclede, Pulaski, Phelps, and Washington).
